PRESS RELEASE

DUNCAN PROJECT – TECHNICAL REPORT 43-101

January 21, 2008 – La Macaza (Québec) - Augyva Mining Resources Inc. (TSX-V : AUV) announces the deposit on SEDAR of a Technical Report 43-101 concerning its Duncan Property located in James Bay. The report has been prepared by Alain-Jean Beauregard, Geologist, and Daniel Gaudreault, P.Eng., qualified persons for the purpose of National Instrument 43-101.

The Duncan Project is located at the Western Part of the La Grande Greenstone Belt and represents an iron ore deposit of the Algoma type, hosted by a volcanosedimentary sequence. The Technical Report 43-101 is available on SEDAR and on Augyva website.

Augyva will undertake additional work on the Duncan property and drilling will start during spring 2008.

Augyva is a mining exploration Company with 5 properties located in James Bay and in Abitibi, Quebec.
